Unit 2 - Week 1

Course outline How does an **NPTEL** online course work? Week 1 Three Introduction (unit? One unit=49&lesson=50) Coordinate Frames and Homogeneous Transformations-I (unit? Six unit=49&lesson=51) Coordinate Frames and Homogeneous Frames-II (unit? unit=49&lesson=52) Differential Transformations (unit? unit=49&lesson=53)

Assignment 1

The due date for submitting this assignment has passed. Due on 2020-02-12, 23:59 IST.

Assignment submitted on 2020-02-08, 14:19 IST

			 -
1) De	gree of Freedom for a rigid body in space is:		

- Six
- Four

Yes, the answer is correct.

Score: 1

Accepted Answers:

2) Which of the following quantities not taken into account for Kinematics of a rigid body?

1 point

1 point

- Position
- Velocity
- Acceleration
- Torque

Yes, the answer is correct.

Score: 1

Accepted Answers:

Torque

Transforming
 Differential
 Changes

WEEKLY FEEDBACK 3) Two vectors are orthonormal if:

1 point

- Their cross product is zero.
- Their dot product is zero.
- Their cross product is one.
- Their dot product is one.

No, the answer is incorrect.

Score: 0

Accepted Answers:

Their dot product is zero.

4) Select True or False:

1 point

Statement: While performing successive translations and rotation , we can change the sequence of Homogeneous transformations.

- True
- False

No, the answer is incorrect.

Score: 0

Accepted Answers:

False

5) Consider following differential coordinate transformation Matrix represented by vectors n, o, a and p. Which of the following is not true?

1 point

$$T = \begin{bmatrix} n_x & o_x & a_x & p_x \\ n_y & o_y & a_y & p_y \\ n_z & o_z & a_z & p_z \\ 0 & 0 & 0 & 1 \end{bmatrix}$$

$$n \times o = a$$

$$a \times n = o$$

$$o \times a = n$$

$$a \times o = n$$

Yes, the answer is correct.

Score: 1

Accepted Answers:

 $a \times o = n$

6) In case of Inverse Kinematics:

1 point

- Base frame position and orientation known; find end-effector position and orientation
- Joint Variables values known; find end-effector position and orientation.
- End -Effector position and orientation known; find values of joint variables.
- End-Effector position and orientation known; find base frame position and orientation.

Yes, the answer is correct. Score: 1 Accepted Answers: End -Effector position and orientation known; find values of joint variables. 7) A triangle with coordinates A(0,0), B(4,0) and C(2,2) rotated about z-axis by 1 point 90° anticlockwise, now triangle will be described by: $A(0,0),B(2,-2),C(0,4)$ $A(0,0),B(2,-2),C(0,4)$ $A(0,0),B(0,4),C(2,2)$ Yes, the answer is correct.
